

Plastic Box Controller

The Plastic Box controller is a compact box design with insight control panel/pressure gauges. This high spec air pressure controller is ideal for use with high or low pressure lifting cushions/bags.

- Lightweight and easily portable
- Pressure gauges are recessed into the box for protection
- Pressure sensitive control joystick for each outlet
- Two outlets with a variety of different types of quick couplings available
- Able to inflate two bags/cushions at a time, with individual control
- Colour coded outlets for easy identification
- Housing available in yellow as standard, other colours available on request
- Straps for easier transportation
- Can be operated with compressor, SCBA breathing air cylinder and regulator or truck brake air source
- Available in either 1 bar or 8 bar.
- Option for phosphorescent gauge.

Used For:

- Crisis rescue
- Road traffic Accidents
- Lifting light aircraft and vehicles

Immersed Pressure Gauge

Pressure Sensitive Joystick

Colour coded outlet

Optional Phosphorescent gauge

Strap Connector

Type	1 Bar	8 Bar
Product Code	CO0031	CO0034

Input Coupling

Output Coupling

Series 26 Female Coupling
(010451)

Series 25 Female coupling
(010248)

Series 25 Output Coupling & Series 26 Input Coupling comes as standard. Other Couplings available on request.
